

June 26, 2015

**Public Health Preparedness and Situational Awareness Report: #2015:24
Reporting for the week ending 06/20/15 (MMWR Week #24)**

CURRENT HOMELAND SECURITY THREAT LEVELS

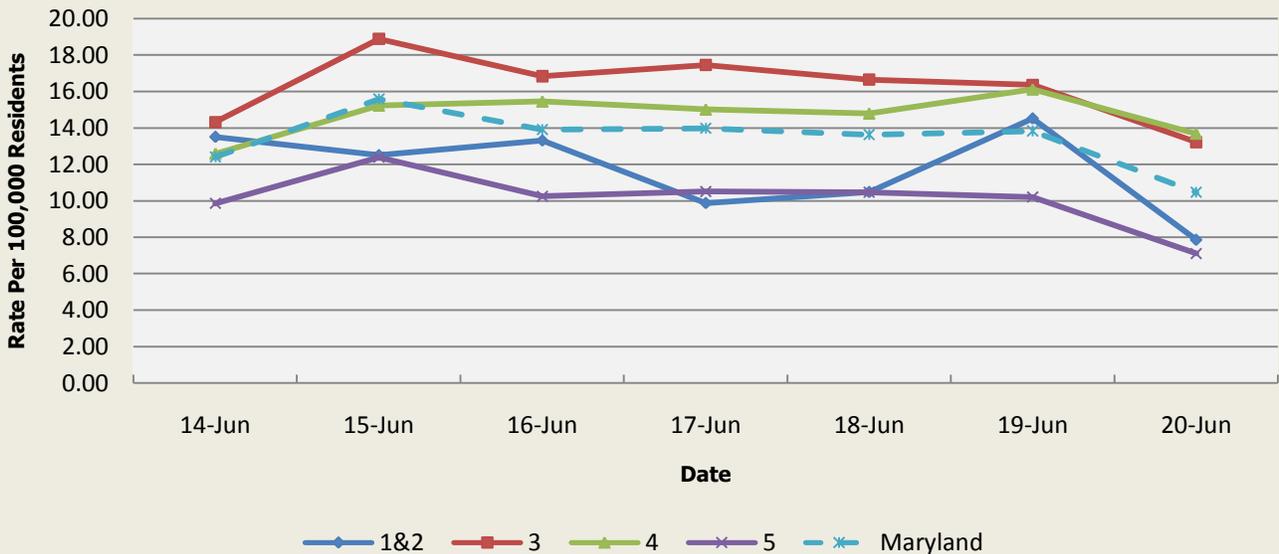

National: No Active Alerts
Maryland: Level Four (MEMA status)

SYNDROMIC SURVEILLANCE REPORTS

ESSENCE (Electronic Surveillance System for the Early Notification of Community-based Epidemics):

Graphical representation is provided for all syndromes (excluding the "Other" category; see Appendix 1) by Health and Medical Regions (See Appendix 2). Emergency department chief complaint data is presented as rates per 100,000 residents using data from the 2010 census.

**Emergency Department Chief Complaints for Gastrointestinal Syndrome
Rate Per 100,000 Residents**

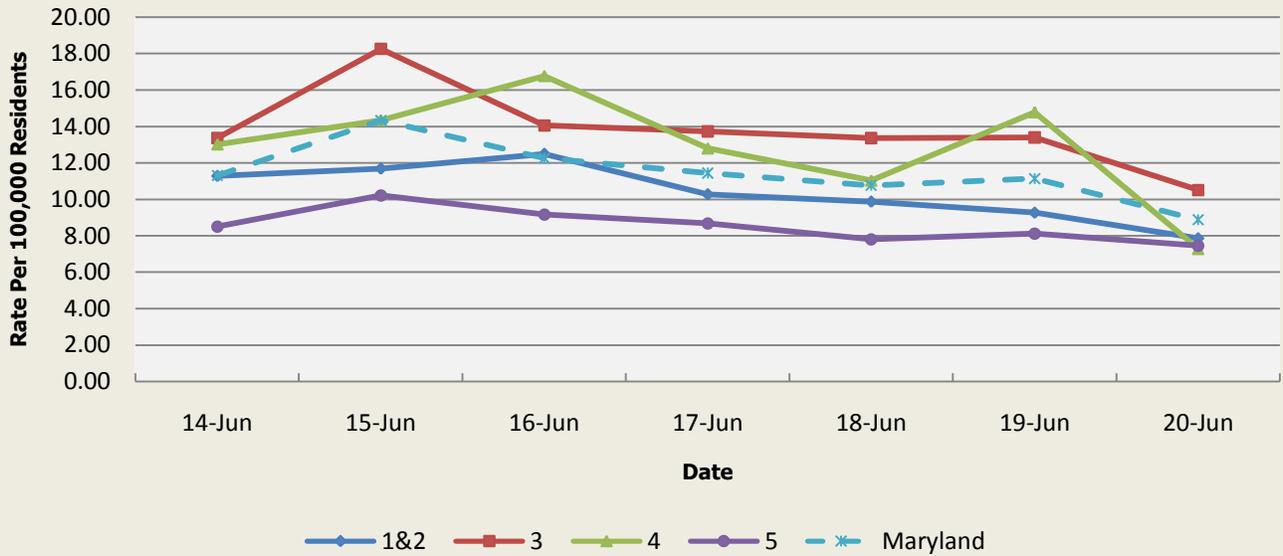

There were two gastrointestinal illness outbreaks reported this week: 1 outbreak of gastroenteritis in a nursing home (Region 5) and 1 outbreak of gastroenteritis/foodborne in an institution (Region 3).

**Gastrointestinal Syndrome Baseline
Data
January 1, 2010 - Present**

Health Region	1&2	3	4	5	Maryland
Mean Rate*	12.96	14.25	15.30	10.08	12.63
Median Rate*	12.91	14.03	14.57	9.95	12.48

* Per 100,000 Residents

**Emergency Department Chief Complaints for Respiratory Syndrome
Rate Per 100,000 Residents**

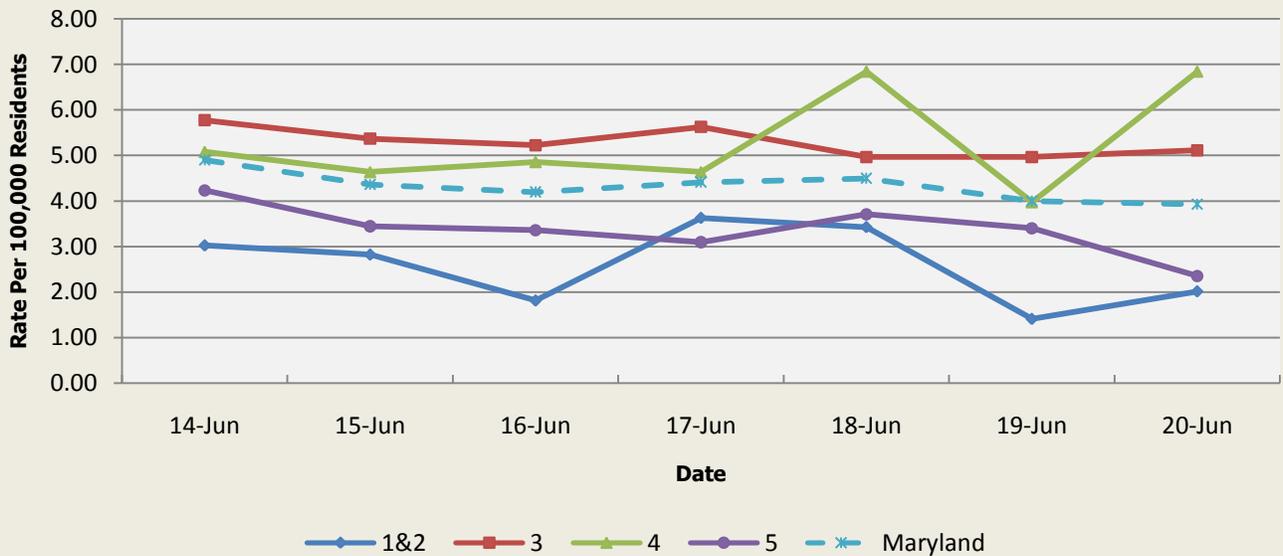

There were no respiratory outbreaks reported this week.

Respiratory Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	11.98	13.42	13.77	9.64	11.88
Median Rate*	11.70	12.90	13.25	9.26	11.46

* Per 100,000 Residents

**Emergency Department Chief Complaints for Fever Syndrome
Rate Per 100,000 Residents**

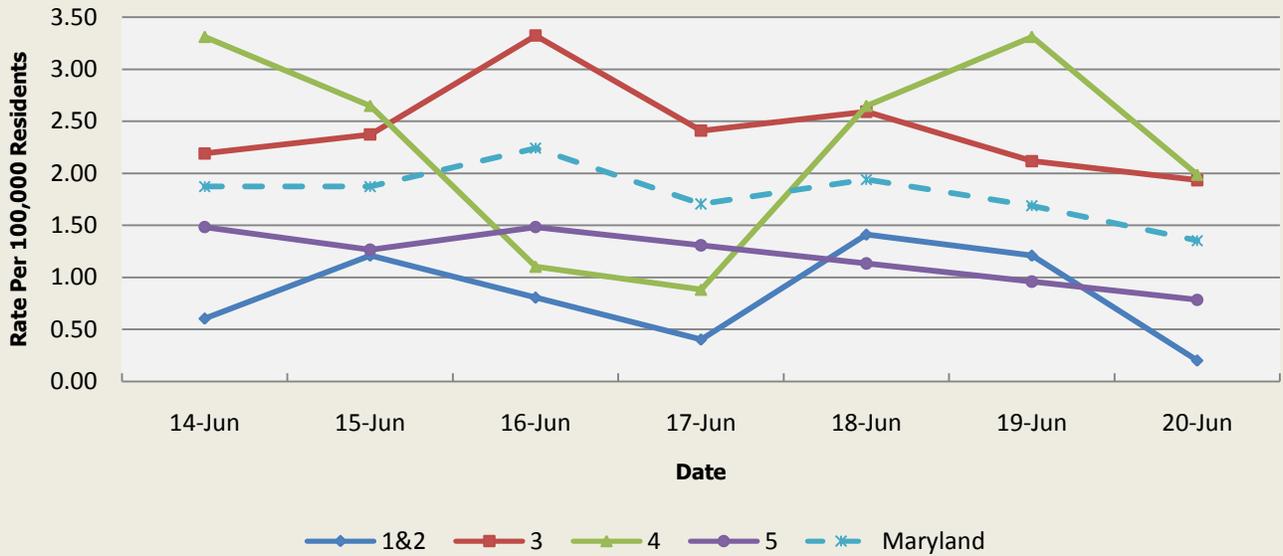

There were no fever outbreaks reported this week.

Fever Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	3.13	3.63	3.88	3.03	3.38
Median Rate*	3.02	3.51	3.75	2.92	3.25

Per 100,000 Residents

**Emergency Department Chief Complaints for Localized Lesion Syndrome
Rate Per 100,000 Residents**

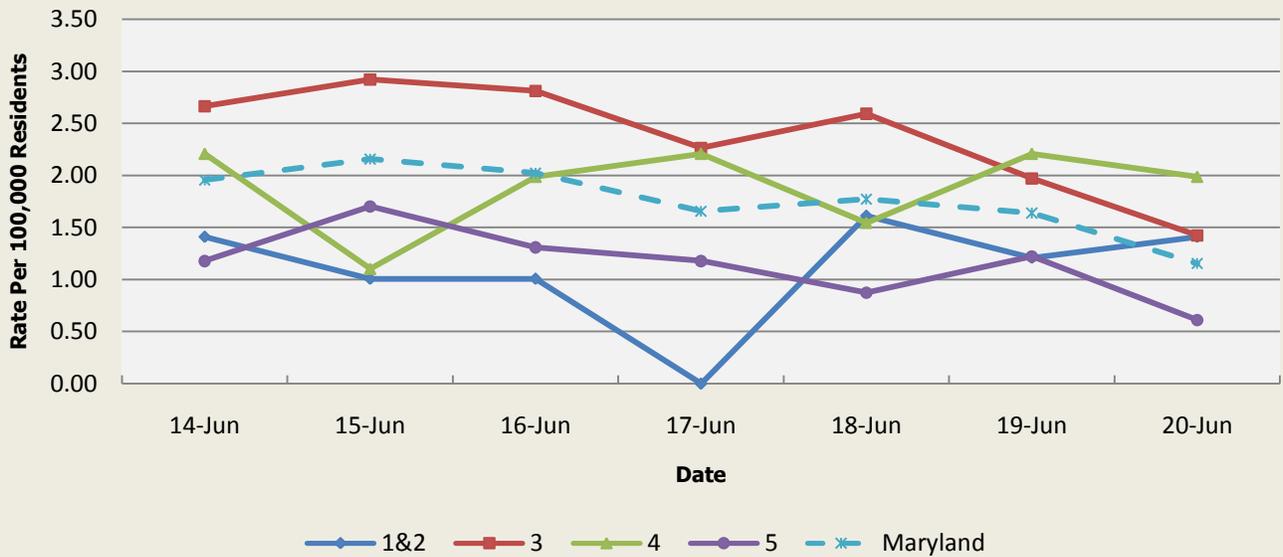

There were no localized lesion outbreaks reported this week.

Localized Lesion Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	1.10	1.90	2.03	0.98	1.49
Median Rate*	1.01	1.86	1.99	0.96	1.44

* Per 100,000 Residents

**Emergency Department Chief Complaints for Rash Syndrome
Rate Per 100,000 Residents**

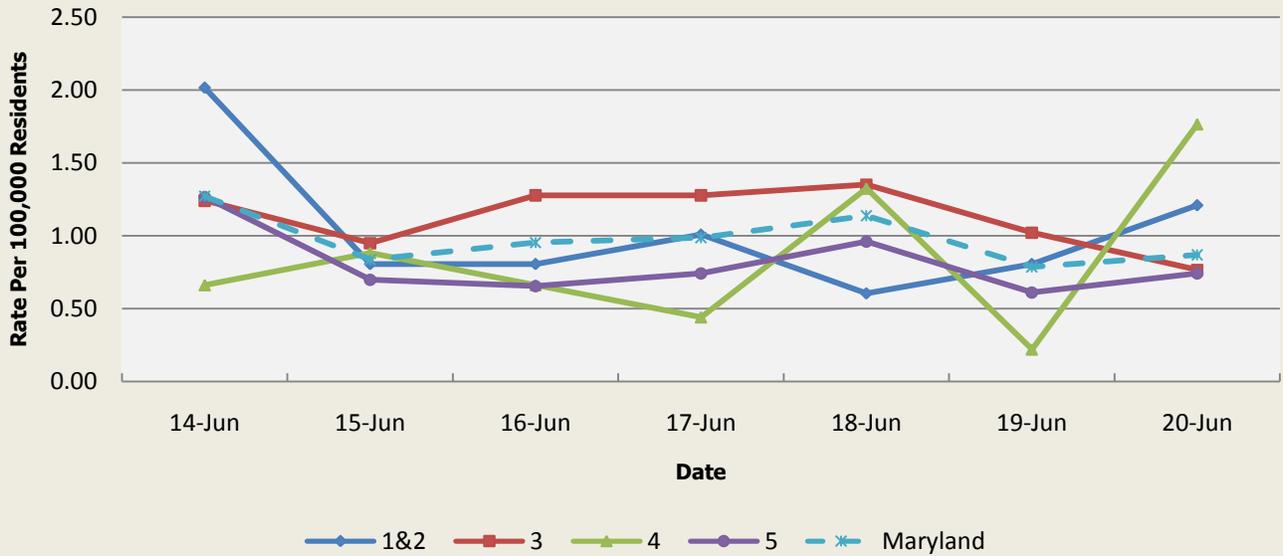

There was one rash illness outbreak reported this week: 1 outbreak of scabies associated with a hospital (Region 5).

Rash Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	1.34	1.71	1.76	1.04	1.43
Median Rate*	1.21	1.64	1.77	1.00	1.37

* Per 100,000 Residents

**Emergency Department Chief Complaints for Neurological Syndrome
Rate Per 100,000 Residents**

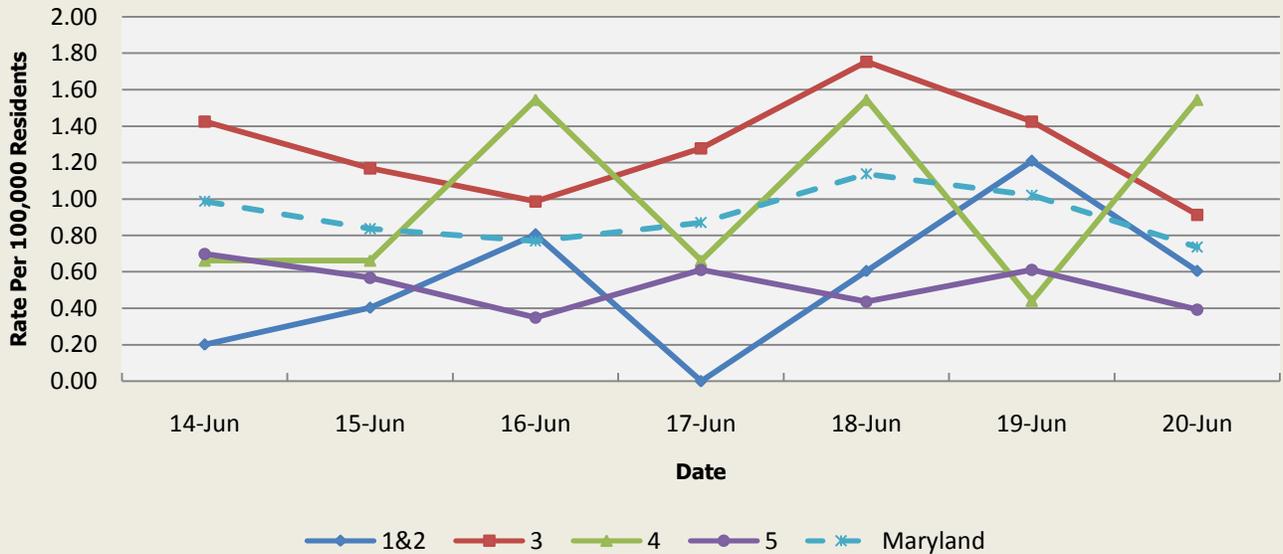

There were no neurological outbreaks reported this week.

Neurological Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.61	0.65	0.61	0.43	0.56
Median Rate*	0.60	0.62	0.66	0.39	0.54

* Per 100,000 Residents

**Emergency Department Chief Complaints for Severe Illness or Death Syndrome
Rate Per 100,000 Residents**

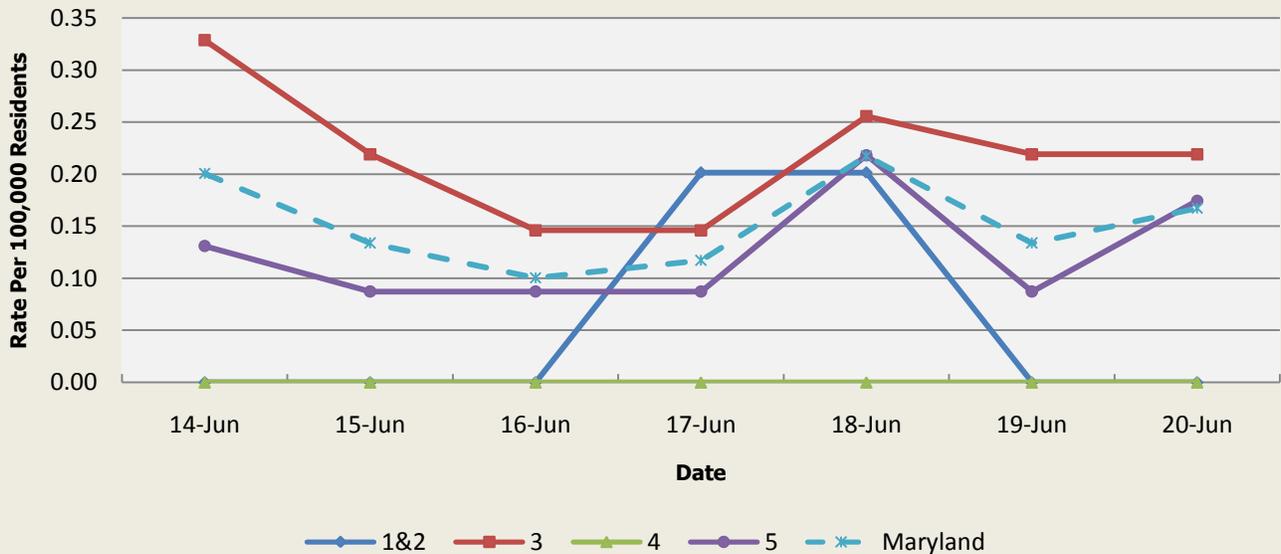

There were no severe illness or death outbreaks reported this week.

Severe Illness or Death Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.75	0.94	0.88	0.41	0.72
Median Rate*	0.81	0.95	0.88	0.39	0.72

* Per 100,000 Residents

SYNDROMES RELATED TO CATEGORY A AGENTS

**Emergency Department Chief Complaints for Botulism-like Syndrome
Rate Per 100,000 Residents**

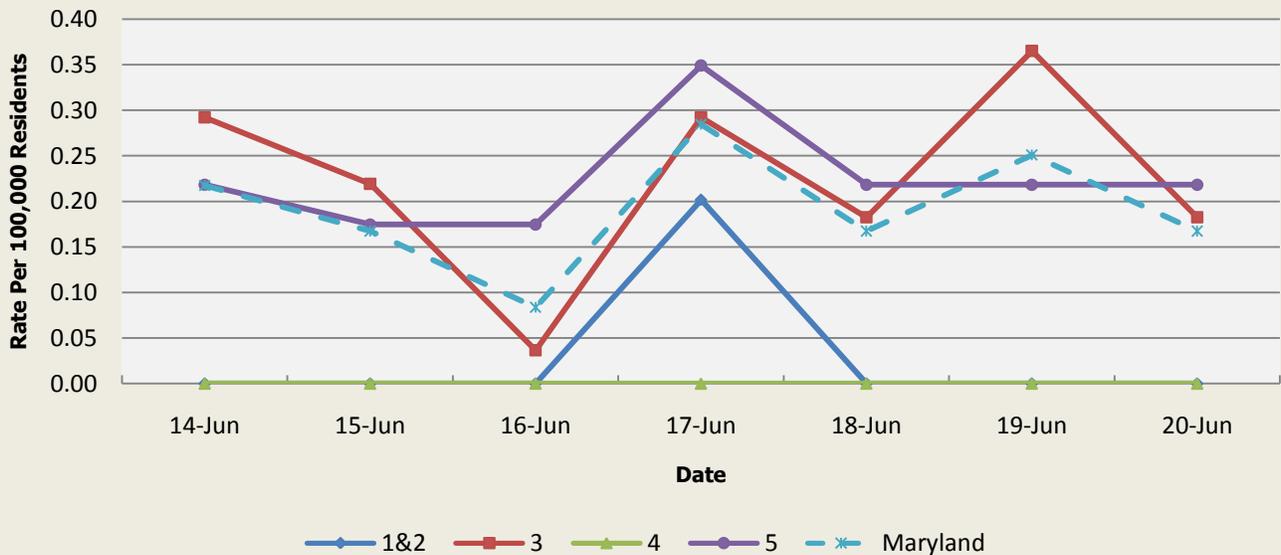

There was an appreciable increase above baseline in the rate of ED visits for Botulism-like Syndrome on 6/14 (Regions 3,5), 6/15 (Region 3), 6/16 (Region 3), 6/17 (Regions 1&2,3), 6/18 (Regions 1&2,3,5), 6/19 (Region 3), and 6/20 (Regions 3,5). These increases are not known to be associated with any outbreaks.

Botulism-like Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.06	0.06	0.04	0.04	0.05
Median Rate*	0.00	0.04	0.00	0.04	0.03

* Per 100,000 Residents

**Emergency Department Chief Complaints for Hemorrhagic Illness Syndrome
Rate Per 100,000 Residents**

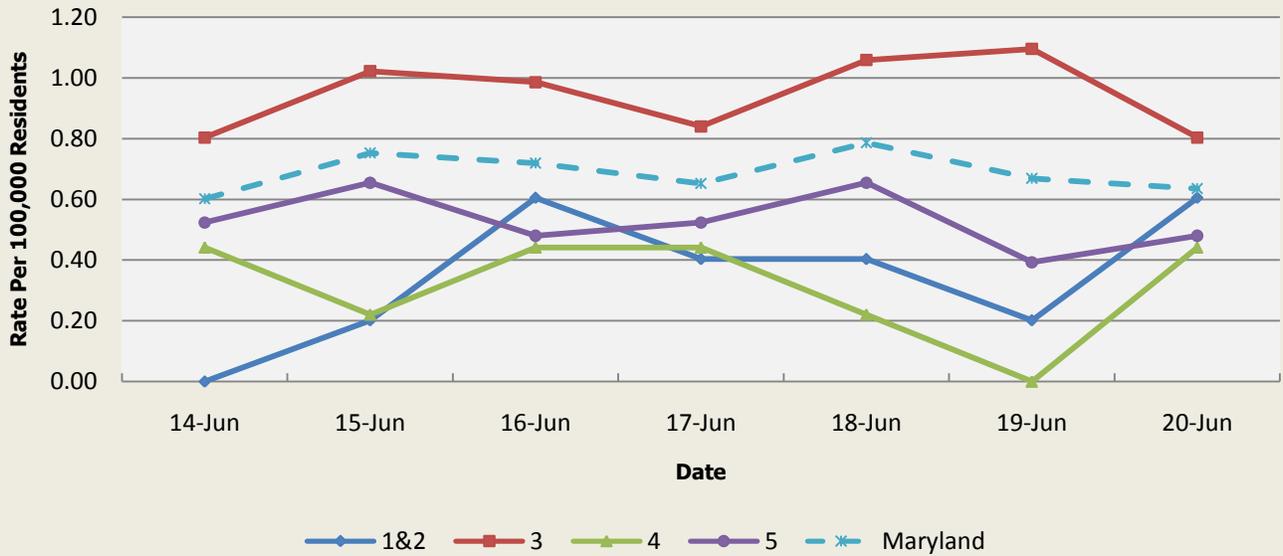

There was an appreciable increase above baseline in the rate of ED visits for Hemorrhagic Illness Syndrome on 6/14 (Regions 3,5), 6/15 (Regions 3,5), 6/16 (Region 5), 6/17 (Regions 1&2,3,5), 6/18 (Regions 3,5), 6/19 (Regions 3,5), and 6/20 (Regions 3,5). These increases are not known to be associated with any outbreaks.

Hemorrhagic Illness Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.03	0.06	0.03	0.04	0.05
Median Rate*	0.00	0.04	0.00	0.00	0.03

* Per 100,000 Residents

**Emergency Department Chief Complaints for Lymphadenitis Syndrome
Rate Per 100,000 Residents**

There was an appreciable increase above baseline in the rate of ED visits for Lymphadenitis Syndrome on 6/14 (Region 3), 6/15 (Regions 3,5), 6/16 (Region 3), 6/17 (Region 3), 6/18 (Regions 3,5), 6/19 (Region 3), and 6/20 (Region 3). These increases are not known to be associated with any outbreaks.

Lymphadenitis Syndrome Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	0.31	0.37	0.34	0.25	0.32
Median Rate*	0.20	0.33	0.22	0.22	0.30

* Per 100,000 Residents

MARYLAND REPORTABLE DISEASE SURVEILLANCE

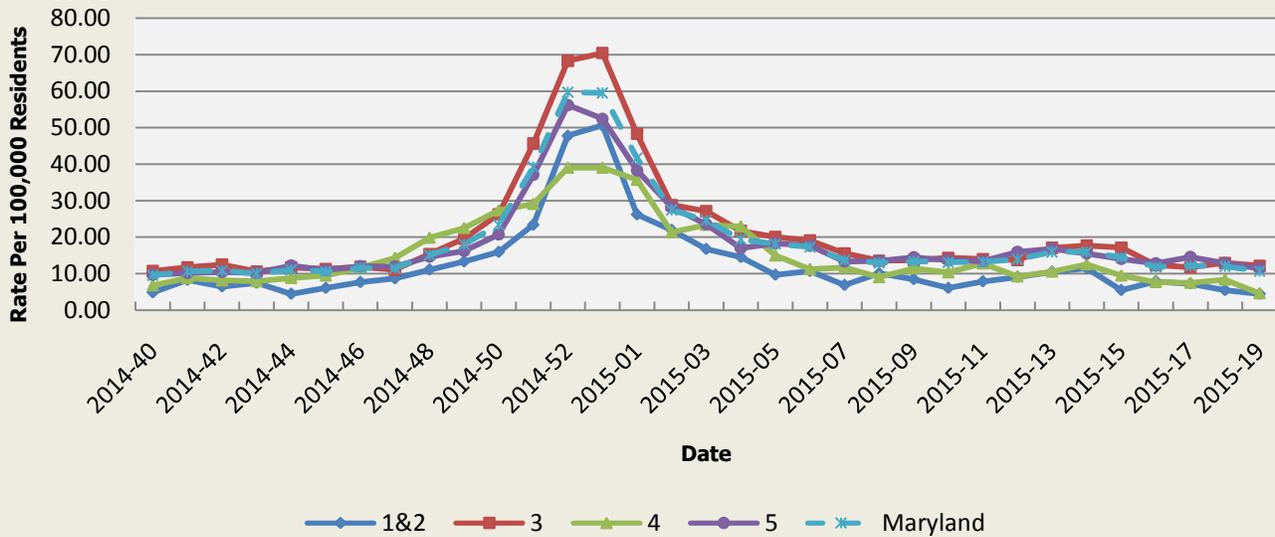

Condition	Counts of Reported Cases‡					
	June			Cumulative (Year to Date)**

SYNDROMIC INFLUENZA SURVEILLANCE

Seasonal Influenza reporting occurs from MMWR Week 40 through MMWR Week 21 (October through May).

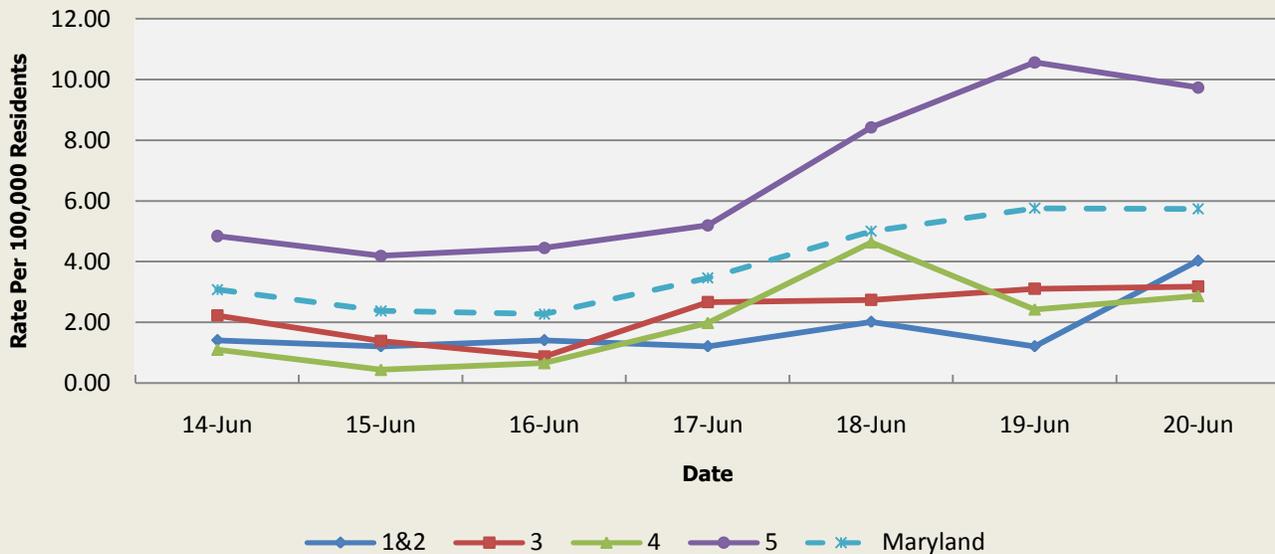

**Emergency Department Chief Complaints for Influenza-like Illness
Rate Per 100,000 Residents**

Influenza-like Illness Baseline Data Week 1 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	9.86	10.58	11.04	9.90	10.30
Median Rate*	8.02	8.26	8.90	7.40	8.00

* Per 100,000 Residents

**Over-the-Counter Medication Sales Related to Influenza
Rate Per 100,000 Residents**

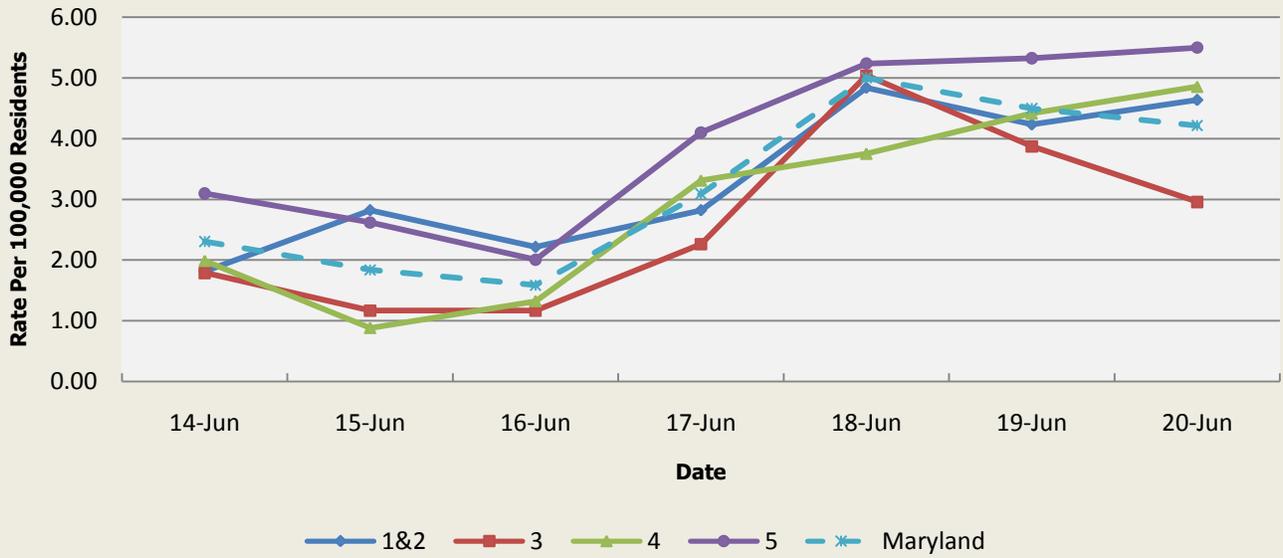

OTC Sales Baseline Data January 1, 2010 - Present					
Health Region	1&2	3	4	5	Maryland
Mean Rate*	5.47	6.15	3.06	14.00	8.87
Median Rate*	4.23	5.08	2.65	11.39	7.19

* Per 100,000 Residents

There was not an appreciable increase above baseline in the rate of OTC flu medication sales this week.

**Over-the-Counter Thermometer Sales
Rate Per 100,000 Residents**

There was not an appreciable increase above baseline in the rate of OTC thermometer sales this week.

	Thermometer Sales Baseline Data January 1, 2010 - Present				
Health Region	1&2	3	4	5	Maryland
Mean Rate*	5.75	4.78	3.35	7.90	5.95
Median Rate*	5.04	4.38	3.09	7.29	5.52

* Per 100,000 Residents

PANDEMIC INFLUENZA UPDATE / AVIAN INFLUENZA-RELATED REPORTS

WHO update: The current WHO phase of pandemic alert for avian influenza is ALERT. Currently, the avian influenza H5N1 virus continues to circulate in poultry in some countries, especially in Asia and northeast Africa. This virus continues to cause sporadic human infections with some instances of limited human-to-human transmission among very close contacts. There has been no sustained human-to-human or community-level transmission identified thus far.

Influenza A (H7N9) is one of a subgroup of influenza viruses that normally circulate among birds. Until recently, this virus had not been seen in people. However, human infections have now been detected. As yet, there is limited information about the scope of the disease the virus causes and about the source of exposure. The disease is of concern because most patients have been severely ill. There is no indication thus far that it can be transmitted between people, but both animal-to-human and human-to-human routes of transmission are being actively investigated.

Alert phase: This is the phase when influenza caused by a new subtype has been identified in humans. Increased vigilance and careful risk assessment, at local, national and global levels, are characteristic of this phase. If the risk assessments indicate that the new virus is not developing into a pandemic strain, a de-escalation of activities towards those in the interpandemic phase may occur. As of May 1, 2015, the WHO-confirmed global total (2003-2015) of human cases of H5N1 avian influenza virus infection stands at 840, of which 447 have been fatal. Thus, the case fatality rate for human H5N1 is approximately 53%.

Avian Influenza in Humans:

H5N1 (EGYPT): 24 June 2015 A 40-year-old woman died of H5N1 avian flu in Upper Egypt's governorate of Sohag Tues [23 Jun 2015], undersecretary of the Ministry of Health for preventive medicine Amr Qandil told Youm7. Read More: <http://www.promedmail.org/direct.php?id=3462638>

There were no reports of human cases of avian influenza in the United States at the time that this report was compiled.

Avian Influenza in Poultry:

H5N1 (GHANA): 21 June 2015 Two poultry farms with a total of 3600 birds at Denu and Keta in the Volta Region have been destroyed due to infection of the farms with avian flu. The poultry farm at Keta started with 1800, but before it came to the notice of veterinary officers, 1100 had died, and 700 had also died at Denu within 3 days. Read More: <http://www.promedmail.org/direct.php?id=3454362>

H5N1 (GAZA): The general director of veterinary services in the Ministry of Agriculture in Gaza, Zakaria Kafarneh, has said: "The ministry has culled during the past 2 days 8500 chickens infected with bird flu on 3 farms located in the Nuseirat area and Deir al-Balah (central Gaza Strip). Read More: <http://www.promedmail.org/direct.php?id=3447479>

NATIONAL DISEASE REPORTS

No national disease reports this week.

INTERNATIONAL DISEASE REPORTS

MERS-COV (MULTI-COUNTRY): 24 June 2015 Read More: <http://www.promedmail.org/direct.php?id=3459401>

EBOLA (MULTI-COUNTRY): 24 June 2015 There were 20 confirmed cases of Ebola virus disease (EVD) reported in the week to 21 Jun 2015, compared with 24 cases the previous week. Weekly case incidence has stalled at between 20 and 27 cases since the end of May 2015, whilst cases continue to arise from unknown sources of infection, and to be detected only after post-mortem testing of community deaths. Read More: <http://www.promedmail.org/direct.php?id=3462639>

MALARIA (INDIA): 24 June 2015 Malaria and other fevers are reporting to be raging in the agency area of Visakhapatnam district. Though the monsoon is yet reach its peak, malaria has spread like wildfire in the entire agency. For the 1st time after a decade, 3438 malaria cases have been registered [so far in 2015]. 1443 cases were registered during the corresponding period in 2014. Read More: <http://www.promedmail.org/direct.php?id=3462420>

HAND, FOOT, AND MOUTH DISEASE (CHINA): 23 June 2015 The Centre for Health Protection (CHP) of the Department of Health is today (23 Jun 2015) investigating an outbreak of hand, foot and mouth disease (HFMD) at a residential child care centre in Causeway Bay, and hence appealed to the public to maintain strict personal and environmental hygiene. NOTE: This weekly review is a compilation of data from various surveillance systems, interpreted with a focus on a potential BT event. It is not meant to be inclusive of all epidemiology data available, nor is it meant to imply that every activity reported is a definitive BT event. International reports of outbreaks due to organisms on the CDC Critical Biological Agent list will also be reported. While not "secure", please handle this information in a professional manner. Please feel free to distribute within your organization, as you feel appropriate, to other professional staff involved in emergency preparedness and infection control.

For questions about the content of this review or if you have received this and do not wish to receive these weekly notices, please e-mail us. If you have information that is pertinent to this notification process, please send it to us to be included in the routine report.
